

```
# Function to add two numbers
def add_two_numbers(num1, num2):
    return num1 + num2

# Example usage
result = add_two_numbers(5, 3)
print('The sum is:', result)
```

```
// Function to concatenate two strings
function concatenateStrings(str1, str2) {
    return str1 + str2;
}

// Example usage
const result = concatenateStrings("Hello, ", "World!");
console.log("The concatenated string is:", result);
```
